

100bp Plus DNA RTU Ladder 52.2µg/500µl

Cat. No.: BR331-500

COMPONENTS: 500 µl

10 mM Tris-HCl (pH 8.0), 10 mM Na-EDTA, 0.025% Orange G, 0.005% Xylene cyanol FF and 10% Glycerol.

DESCRIPTION: Loading volume: 5 µl/well

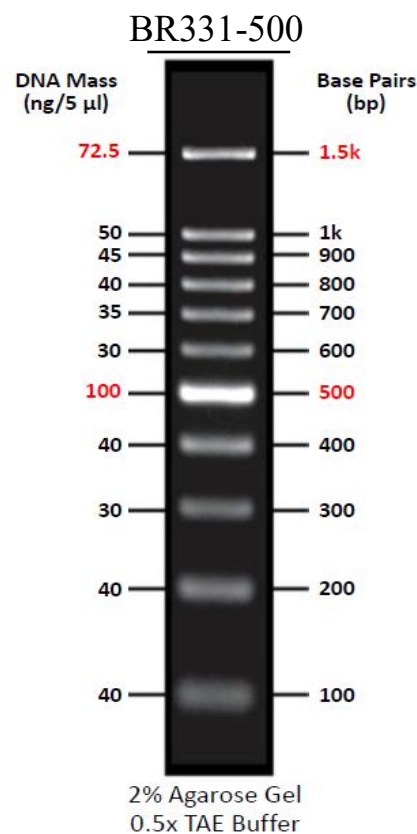

Size range: 100-1500 bp

Package size: 52.2 µg/ 500 µl

INSTRUCTIONS:

The Biomate 100bp Plus DNA RTU Ladder 52.2µg/500µl (BR331-500) is composed of 11 individual DNA fragments: 1.5k, 1k, 900, 800, 700, 600, 500, 400, 300, 200, and 100 base pairs. This product contains two enhanced bands (1.5k and 500 bp) for easy reference.

The ladder is ready-to-use, which is premixed with loading buffer and tracking dye for direct loading on gel.

STORAGE: Store at Room temperature ≥ 6 months,
4°C ≥ 12 months,
-20°C ≥ 36 months

For Research Using Only.
